

Our Rescue Mission

Northeast Boston Terrier Rescue (NEBTR) is comprised of Volunteers based in NY, NJ and PA, and serves Boston Terriers in need within the reach of our helping hands. Most dogs in foster care for placement are adolescent to adult dogs in need of re-homing for a multitude of reasons. Our caring hands guide them as they transition into new homes. All of our rescue dogs are fostered and evaluated for a 2 week minimum to allow us to assess their personality and provide them with basic foundation skills like house training, crate training, and basic manners to ease their transition into new homes. It is our belief such work in foster care better prepares dogs for success and helps them form lasting bonds.

NEBTR's single priority in Rescue is to serve the needs of the individual dog in our care. While many loving homes, individuals and families apply to adopt rescue dogs, we frequently receive multiple applicants for a dog. Therefore, our placement process is intended to supply the dog with a home suitable to meet its individual needs. Rescue volunteers also receive the same screening procedures, as do our adopters.

About Boston Terriers

The Boston Terrier is often referred to as "The American Gentleman", referring to the fact that this is the first breed that started in America - making them truly an American dog!

Bostons are lively, affectionate dogs who want nothing more than to be with their humans. If you are looking for a dog that is low maintenance, loving, and loyal this is the breed for you. Bostons usually get along with other dogs, cats, and with children.

Gator

As with all animals, there are certain things you should be aware of before considering ownership. Bostons are indoor dogs usually just wanting to go outside for elimination and short investigation or walks. Bostons have very short noses leaving them very sensitive to heat and cold. Bostons are active dogs who love to play and interact with their humans, even into their advanced years. Bostons live an average of 11 to 13 years with many living to 15 or 16 years of age. They are a long term commitment. Most Bostons snore and love to sleep in bed with their humans. As with any breed, Bostons can be prone to health problems as they get older, requiring some expense.

The Adoption Process

Your Adoption Application is the first step in your adoption to enable us to match you with your potential new Best Friend. Reference checks & home visits are also required elements to NEBTR adoption, and it is our policy to complete all screening checks Prior to introducing dogs to adopters.

NEBTR does not buy OR sell dogs.

There is an adoption fee which usually ranges between \$100 and \$600, depending upon age and health or vet care requirements of rescued dogs. Adoption fees are in place to defer the veterinary costs for all of the dogs in our care. All veterinary records known to NEBTR will accompany each dog upon completed Adoption Agreement, along with a record for services rendered while in our care.

Our **FIRST & PRIMARY** goal is to provide the best home possible for each dog so they will never have to come into rescue or a shelter again. Placement is made based upon the needs of each dog and the opportunities offered by an applicant's home.

If you are interested in adopting a rescued Boston Terrier you may contact our Applications Coordinator, Debra Brigham, who will send you an application.

Our Success Stories!

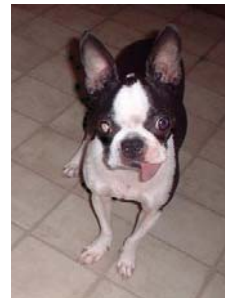

Addie was a stray in NYC who when found had cherry eyes, kennel cough, and was very underweight.

She is now healthy, and lives on Long Island with a loving family and a dachshund playmate.

Ladybug, now renamed Bug, was picked up by NYC Animal Control wandering the streets of Brooklyn. Bug has brain damage and had a bad staph infection when found.

We are happy to report that Bug has a new family in PA - she is healthy and happy, has learned to cope with her disabilities, and is a total joy to her new family.

This attractive fellow is Champ. He was abused by his former owners, his jaw was broken and never set, so his tongue hangs

out of his mouth. Champs new owners report that this just adds to his wonderful personality! He now has a caring family who loves him and his flaws.

Daisy and Lilly were found in a shelter in NJ. They had been there for over a month before

one of our volunteers rescued them. They were timid, scared, and very attached to each other. A vet found that Daisy needed surgery on both back legs. She has since had her surgery and has fully recovered. Daisy and Lilly have found the perfect home together.

Mason, 'the smiling Boston' was surrendered to NEBTR with his sister because his family had

very little time to spend with them due to business. Mason is now living like a king in NJ and has never lost his wonderful smile!

Donations to NEBTR are tax deductible and most welcome and appreciated! Your generosity helps us to reach more animals in need!

Donations may be sent to: Sheryl Trent, 529 West 42 Street#9R, NY, NY 10036

Check should be made payable to 'Northeast Boston Terrier Rescue, Inc.'

Thank you!
